

# Women's Health Day :

Out of our care to women's health , we specially prepared a program of a comprehensive medical checkup for women

- ✿ We were surprised by how much this day was in demand, the thing which made us prepare two days rather than one.
- ✿ **Number of patients:**  
We received on both days 30 women in total.

- ✿ The program included gynecology, general medicine and surgical examination.
- ✿ It also included blood chemistry and virology.
- ✿ They were also subject to abdomeno-pelvic and breast ultrasound and mammography for those who are recommended.
- ✿ The program's actual cost is 800 L.E , but we supported it financially that the paid fee was only 250 L.E .

- A 51 years old married lady complained some time ago of breast pain, where she sought medical advice and she was given some kind of tablets to reduce breast pain.

On the WHD for checkup; by examination, it was suspicious mass which was proved to be malignant by further investigations.

The positive results made a big resonance among woman in her community which raised the awareness of the need for regular checkup, where we received multiple calls for checkups.

According to the great demand & need to such program, we decided to repeat this program frequently, so as to be carried out once a month.
